*Contact Europass National Center: <http://www.europass-ro.ro>, phone: (021)2010716, fax: (021)3121682

Europass Mobility is a standard European document, which records details of the contents and the results - in terms of skills and competences or of academic achievements - of a period that a person of whatever age, educational level and occupational status has spent in another European country (UE/EFTA/EEA and candidate countries) for learning purposes.

Description of the mobility experience

21 OBJECTIVES OF THE MOBILITY EXPERIENCE *

PROJECT OBJECTIVES:

- 1.Training of general and technical skills and competences at high quality level in the initial training for technician technical calculation operator student .
- 2.Development of attitudes, behaviors, key competences, to the participants, coming from social media with risk of exclusion, in order to increase competitiveness and the degree of employment in the dynamic world of the labor market, becoming as active European citizens.
- 3.Developing cooperation with external partners capable of providing quality education and training for a successful career path and in the life of mobility participant

22 EDUCATION OR TRAINING INITIATIVE IN THE COURSE OF WHICH THE MOBILITY EXPERIENCE WAS COMPLETED

Erasmus + K1 -Mobility Project for VET learners -qualification-Computing Technician Operator

23 COMMUNITY OR MOBILITY PROGRAMME INVOLVED

Erasmus+ Mobility Project -2020-1-RO01-KA102-078278

DURATION OF THE EUROPASS MOBILITY EXPERIENCE

24 FROM * 17 01 2022 25 TO * 04 02 2022
dd mm yyyy dd mm yyyy

Skills acquired during the mobility experience

26A ACTIVITIES/TASKS CARRIED OUT *

The participant carried out the following learning activities:

- developed activities for installing Windows operating system according to PC configuration:studied the PC's configuration and to decided the proper Windows version,configure the BIOS for installing the operating system;prepared the hard disk for installing the operating system,install the operating system;the drivers for a proper functioning of the operating system;used the option for account administration in Control Panel;maked account operations;connectd the peripheral input and output equipment or input-output;installed the drivers and the programs associated to the peripheral devices of input, output or input-output.
- checked the daily updates of the operating system;used addition and deletion option Windows components;set up the Start Up option;achieved restorations for the operating system;set up the Control Panel options which allows the optimization of the operating system.
- installed applications in predefined conditions;uninstalled applications;
- installed programs necessary for break-in detection systems , for fire detection , systems ,video surveillance systems and video-interphonic surveillance systems
- installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers ,pdf ,installed the applications for file archivers and unpackers ,file managers, printing DVD's software.
- installed applications for the internet browsers, extensions;multimedia applications (media players, codecs);install security applications – antivirus, firewall:
- installed and to set up the Linux operating system,set up the BIOS for installed the operating system;prepared the hard disk for installing the operating system,drivers for a proper functioning of the operating system,use the option account administration from Control Panel;maked different operations with accounts;connected the input ,output or input-output peripheral equipment;
- installed the GParted Live application-partition for Linux system, the Open Source applications
- Installed applications for file archivers and archivers ,file managers, printing DVD's software-K3b for printing; installing the application Gimp for photos editing, Blender for 3D shaping; installing the applications for internet browsers, extensions : Opera for Linux , Skype for Linux ,Pidgin –instant messaging service, Beagle – searching engine.
- Installed the multimedia applications – media players, codecs :VLC media player for Linux; installed the security applications-antivirus, firewall, Magic Rescue for recovering files, IPCOP, Comodo antivirus
- installed programs necessary for break-in detection systems , for fire detection systems ,video surveillance systems and video-interphone surveillance systems for computers with Linux operating system
- installed and setting up the Android operating system; upgraded the operating system for a new version (OTA/ with computer system

-installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers , pdf for smartphones

Installed and setting up the IOS system , upgraded the system for a new version ,the system personalization , setted up the user account/ access the application magazine ,using the Cloud services

27A JOB-RELATED SKILLS

Skills:

- Knowing the license types and programmes for the operating systems
- Choosing the operating system to install depending on the hardware and requirements
- Installing /restoring of the operating system according to the license
- Installing/updating drivers according to the hardware
- Configuration of the computer system according to the users demands
- Responsible attitude in using the software
- Executing the installing operations autonomically
- Permanent interest for individual study and using the tutor information
- Taking critical attitude and responsible using of information
- Using correctly the common vocabulary and the speciality one
- Telling the results of the professional activity

Attitudes:

- Collaboration with the team members to fulfil the tasks
- Taking the responsibility related to functioning and the integrity of the equipment
- Permanent interest to make works respecting health and safety measures
- Taking the responsibility for the received task
- Taking the initiative for solving some problems
- Rightness and respect for the customer
- Responsibility for the quality of the products.

28A LANGUAGE SKILLS

Improvement of the use of English, at the end of the internship, through communication with the trainee tutor and initiation in Spanish communication.

29A COMPUTER SKILLS

Advanced knowledge in the programmes for operating systems

30A ORGANISATIONAL / MANAGERIAL SKILLS

Good ability in organizing task fulfilled during the training: identification of priorities a good administration of the relation with the other members of the team

31A COMMUNICATION SKILLS

Communication skills for daily contacts with the other members of the work team.

32A OTHER SKILLS

Improvement of the cultural knowledge about the Spanish identity space and increasing the flexibility and adaptability level.

Europass Mobility is a standard European document, which records details of the contents and the results - in terms of skills and competences or of academic achievements - of a period that a person of whatever age, educational level and occupational status has spent in another European country (UE/EFTA/EEA and candidate countries) for learning purposes.

Description of the mobility experience

21 OBJECTIVES OF THE MOBILITY EXPERIENCE *

PROJECT OBJECTIVES:

- 1.Training of general and technical skills and competences at high quality level in the initial training for technician technical calculation operator student .
- 2.Development of attitudes, behaviors, key competences, to the participants, coming from social media with risk of exclusion, in order to increase competitiveness and the degree of employment in the dynamic world of the labor market, becoming as active European citizens.
- 3.Developing cooperation with external partners capable of providing quality education and training for a successful career path and in the life of mobility participant

22 EDUCATION OR TRAINING INITIATIVE IN THE COURSE OF WHICH THE MOBILITY EXPERIENCE WAS COMPLETED

Erasmus + K1 -Mobility Project for VET learners -qualification-Computing Technician Operator

23 COMMUNITY OR MOBILITY PROGRAMME INVOLVED

Erasmus+ Mobility Project -2020-1-RO01-KA102-078278

DURATION OF THE EUROPASS MOBILITY EXPERIENCE

24 FROM * 17 01 2022 25 TO * 04 02 2022
dd mm yyyy dd mm yyyy

Skills acquired during the mobility experience

26A ACTIVITIES/TASKS CARRIED OUT *

The participant carried out the following learning activities:

- developed activities for installing Windows operating system according to PC configuration:studied the PC's configuration and to decided the proper Windows version,configure the BIOS for installing the operating system;prepared the hard disk for installing the operating system,install the operating system;the drivers for a proper functioning of the operating system;used the option for account administration in Control Panel;maked account operations;connectd the peripheral input and output equipment or input-output;installed the drivers and the programs associated to the peripheral devices of input, output or input-output.
- checked the daily updates of the operating system;used addition and deletion option Windows components;set up the Start Up option;achieved restorations for the operating system;set up the Control Panel options which allows the optimization of the operating system.
- installed applications in predefined conditions;uninstalled applications;
- installed programs necessary for break-in detection systems , for fire detection , systems ,video surveillance systems and video-interphonic surveillance systems
- installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers ,pdf ,installed the applications for file archivers and unpackers ,file managers, printing DVD's software.
- installed applications for the internet browsers, extensions;multimedia applications (media players, codecs);install security applications – antivirus, firewall:
- installed and to set up the Linux operating system,set up the BIOS for installed the operating system;prepared the hard disk for installing the operating system,drivers for a proper functioning of the operating system,use the option account administration from Control Panel;maked different operations with accounts;connected the input ,output or input-output peripheral equipment;
- installed the GParted Live application-partition for Linux system, the Open Source applications
- Installed applications for file archivers and archivers ,file managers, printing DVD's software-K3b for printing; installing the application Gimp for photos editing, Blender for 3D shaping; installing the applications for internet browsers, extensions : Opera for Linux , Skype for Linux ,Pidgin –instant messaging service, Beagle – searching engine.
- Installed the multimedia applications – media players, codecs :VLC media player for Linux; installed the security applications-antivirus, firewall, Magic Rescue for recovering files, IPCOP, Comodo antivirus
- installed programs necessary for break-in detection systems , for fire detection systems ,video surveillance systems and video-interphone surveillance systems for computers with Linux operating system
- installed and setting up the Android operating system; upgraded the operating system for a new version (OTA/ with computer system

-installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers , pdf for smartphones

Installed and setting up the IOS system , upgraded the system for a new version ,the system personalization , setted up the user account/ access the application magazine ,using the Cloud services

27A JOB-RELATED SKILLS

Skills:

- Knowing the license types and programmes for the operating systems
- Choosing the operating system to install depending on the hardware and requirements
- Installing /restoring of the operating system according to the license
- Installing/updating drivers according to the hardware
- Configuration of the computer system according to the users demands
- Responsible attitude in using the software
- Executing the installing operations autonomically
- Permanent interest for individual study and using the tutor information
- Taking critical attitude and responsible using of information
- Using correctly the common vocabulary and the speciality one
- Telling the results of the professional activity

Attitudes:

- Collaboration with the team members to fulfil the tasks
- Taking the responsibility related to functioning and the integrity of the equipment
- Permanent interest to make works respecting health and safety measures
- Taking the responsibility for the received task
- Taking the initiative for solving some problems
- Rightness and respect for the customer
- Responsibility for the quality of the products.

28A LANGUAGE SKILLS

Improvement of the use of English, at the end of the internship, through communication with the trainee tutor and initiation in Spanish communication.

29A COMPUTER SKILLS

Advanced knowledge in the programmes for operating systems

30A ORGANISATIONAL / MANAGERIAL SKILLS

Good ability in organizing task fulfilled during the training: identification of priorities a good administration of the relation with the other members of the team

31A COMMUNICATION SKILLS

Communication skills for daily contacts with the other members of the work team.

32A OTHER SKILLS

Improvement of the cultural knowledge about the Spanish identity space and increasing the flexibility and adaptability level.

Europass Mobility is a standard European document, which records details of the contents and the results - in terms of skills and competences or of academic achievements - of a period that a person of whatever age, educational level and occupational status has spent in another European country (UE/EFTA/EEA and candidate countries) for learning purposes.

Description of the mobility experience

21 OBJECTIVES OF THE MOBILITY EXPERIENCE *

PROJECT OBJECTIVES:

- 1.Training of general and technical skills and competences at high quality level in the initial training for technician technical calculation operator student .
- 2.Development of attitudes, behaviors, key competences, to the participants, coming from social media with risk of exclusion, in order to increase competitiveness and the degree of employment in the dynamic world of the labor market, becoming as active European citizens.
- 3.Developing cooperation with external partners capable of providing quality education and training for a successful career path and in the life of mobility participant

22 EDUCATION OR TRAINING INITIATIVE IN THE COURSE OF WHICH THE MOBILITY EXPERIENCE WAS COMPLETED

Erasmus + K1 -Mobility Project for VET learners -qualification-Computing Technician Operator

23 COMMUNITY OR MOBILITY PROGRAMME INVOLVED

Erasmus+ Mobility Project -2020-1-RO01-KA102-078278

DURATION OF THE EUROPASS MOBILITY EXPERIENCE

24 FROM * 17 01 2022 25 TO * 04 02 2022
dd mm yyyy dd mm yyyy

Skills acquired during the mobility experience

26A ACTIVITIES/TASKS CARRIED OUT *

The participant carried out the following learning activities:

- developed activities for installing Windows operating system according to PC configuration:studied the PC's configuration and to decided the proper Windows version,configure the BIOS for installing the operating system;prepared the hard disk for installing the operating system,install the operating system;the drivers for a proper functioning of the operating system;used the option for account administration in Control Panel;maked account operations;connectd the peripheral input and output equipment or input-output;installed the drivers and the programs associated to the peripheral devices of input, output or input-output.
- checked the daily updates of the operating system;used addition and deletion option Windows components;set up the Start Up option;achieved restorations for the operating system;set up the Control Panel options which allows the optimization of the operating system.
- installed applications in predefined conditions;uninstalled applications;
- installed programs necessary for break-in detection systems , for fire detection , systems ,video surveillance systems and video-interphonic surveillance systems
- installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers ,pdf ,installed the applications for file archivers and unpackers ,file managers, printing DVD's software.
- installed applications for the internet browsers, extensions;multimedia applications (media players, codecs);install security applications – antivirus, firewall:
- installed and to set up the Linux operating system,set up the BIOS for installed the operating system;prepared the hard disk for installing the operating system,drivers for a proper functioning of the operating system,use the option account administration from Control Panel;maked different operations with accounts;connected the input ,output or input-output peripheral equipment;
- installed the GParted Live application-partition for Linux system, the Open Source applications
- Installed applications for file archivers and archivers ,file managers, printing DVD's software-K3b for printing; installing the application Gimp for photos editing, Blender for 3D shaping; installing the applications for internet browsers, extensions : Opera for Linux , Skype for Linux ,Pidgin –instant messaging service, Beagle – searching engine.
- Installed the multimedia applications – media players, codecs :VLC media player for Linux; installed the security applications-antivirus, firewall, Magic Rescue for recovering files, IPCOP, Comodo antivirus
- installed programs necessary for break-in detection systems , for fire detection systems ,video surveillance systems and video-interphone surveillance systems for computers with Linux operating system
- installed and setting up the Android operating system; upgraded the operating system for a new version (OTA/ with computer system

-installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers , pdf for smartphones

Installed and setting up the IOS system , upgraded the system for a new version ,the system personalization , setted up the user account/ access the application magazine ,using the Cloud services

27A JOB-RELATED SKILLS

Skills:

- Knowing the license types and programmes for the operating systems
- Choosing the operating system to install depending on the hardware and requirements
- Installing /restoring of the operating system according to the license
- Installing/updating drivers according to the hardware
- Configuration of the computer system according to the users demands
- Responsible attitude in using the software
- Executing the installing operations autonomically
- Permanent interest for individual study and using the tutor information
- Taking critical attitude and responsible using of information
- Using correctly the common vocabulary and the speciality one
- Telling the results of the professional activity

Attitudes:

- Collaboration with the team members to fulfil the tasks
- Taking the responsibility related to functioning and the integrity of the equipment
- Permanent interest to make works respecting health and safety measures
- Taking the responsibility for the received task
- Taking the initiative for solving some problems
- Rightness and respect for the customer
- Responsibility for the quality of the products.

28A LANGUAGE SKILLS

Improvement of the use of English, at the end of the internship, through communication with the trainee tutor and initiation in Spanish communication.

29A COMPUTER SKILLS

Advanced knowledge in the programmes for operating systems

30A ORGANISATIONAL / MANAGERIAL SKILLS

Good ability in organizing task fulfilled during the training: identification of priorities a good administration of the relation with the other members of the team

31A COMMUNICATION SKILLS

Communication skills for daily contacts with the other members of the work team.

32A OTHER SKILLS

Improvement of the cultural knowledge about the Spanish identity space and increasing the flexibility and adaptability level.

Europass Mobility is a standard European document, which records details of the contents and the results - in terms of skills and competences or of academic achievements - of a period that a person of whatever age, educational level and occupational status has spent in another European country (UE/EFTA/EEA and candidate countries) for learning purposes.

Description of the mobility experience

21 OBJECTIVES OF THE MOBILITY EXPERIENCE *

PROJECT OBJECTIVES:

- 1.Training of general and technical skills and competences at high quality level in the initial training for technician technical calculation operator student .
- 2.Development of attitudes, behaviors, key competences, to the participants, coming from social media with risk of exclusion, in order to increase competitiveness and the degree of employment in the dynamic world of the labor market, becoming as active European citizens.
- 3.Developing cooperation with external partners capable of providing quality education and training for a successful career path and in the life of mobility participant

22 EDUCATION OR TRAINING INITIATIVE IN THE COURSE OF WHICH THE MOBILITY EXPERIENCE WAS COMPLETED

Erasmus + K1 -Mobility Project for VET learners -qualification-Computing Technician Operator

23 COMMUNITY OR MOBILITY PROGRAMME INVOLVED

Erasmus+ Mobility Project -2020-1-RO01-KA102-078278

DURATION OF THE EUROPASS MOBILITY EXPERIENCE

24 FROM * 17 01 2022 25 TO * 04 02 2022
dd mm yyyy dd mm yyyy

Skills acquired during the mobility experience

26A ACTIVITIES/TASKS CARRIED OUT *

The participant carried out the following learning activities:

- developed activities for installing Windows operating system according to PC configuration:studied the PC's configuration and to decided the proper Windows version,configure the BIOS for installing the operating system;prepared the hard disk for installing the operating system,install the operating system;the drivers for a proper functioning of the operating system;used the option for account administration in Control Panel;maked account operations;connectd the peripheral input and output equipment or input-output;installed the drivers and the programs associated to the peripheral devices of input, output or input-output.
- checked the daily updates of the operating system;used addition and deletion option Windows components;set up the Start Up option;achieved restorations for the operating system;set up the Control Panel options which allows the optimization of the operating system.
- installed applications in predefined conditions;uninstalled applications;
- installed programs necessary for break-in detection systems , for fire detection , systems ,video surveillance systems and video-interphonic surveillance systems
- installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers ,pdf ,installed the applications for file archivers and unpackers ,file managers, printing DVD's software.
- installed applications for the internet browsers, extensions;multimedia applications (media players, codecs);install security applications – antivirus, firewall:
- installed and to set up the Linux operating system,set up the BIOS for installed the operating system;prepared the hard disk for installing the operating system,drivers for a proper functioning of the operating system,use the option account administration from Control Panel;maked different operations with accounts;connected the input ,output or input-output peripheral equipment;
- installed the GParted Live application-partition for Linux system, the Open Source applications
- Installed applications for file archivers and archivers ,file managers, printing DVD's software-K3b for printing; installing the application Gimp for photos editing, Blender for 3D shaping; installing the applications for internet browsers, extensions : Opera for Linux , Skype for Linux ,Pidgin –instant messaging service, Beagle – searching engine.
- Installed the multimedia applications – media players, codecs :VLC media player for Linux; installed the security applications-antivirus, firewall, Magic Rescue for recovering files, IPCOP, Comodo antivirus
- installed programs necessary for break-in detection systems , for fire detection systems ,video surveillance systems and video-interphone surveillance systems for computers with Linux operating system
- installed and setting up the Android operating system; upgraded the operating system for a new version (OTA/ with computer system

-installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers , pdf for smartphones

Installed and setting up the IOS system , upgraded the system for a new version ,the system personalization , setted up the user account/ access the application magazine ,using the Cloud services

27A JOB-RELATED SKILLS

Skills:

- Knowing the license types and programmes for the operating systems
- Choosing the operating system to install depending on the hardware and requirements
- Installing /restoring of the operating system according to the license
- Installing/updating drivers according to the hardware
- Configuration of the computer system according to the users demands
- Responsible attitude in using the software
- Executing the installing operations autonomically
- Permanent interest for individual study and using the tutor information
- Taking critical attitude and responsible using of information
- Using correctly the common vocabulary and the speciality one
- Telling the results of the professional activity

Attitudes:

- Collaboration with the team members to fulfil the tasks
- Taking the responsibility related to functioning and the integrity of the equipment
- Permanent interest to make works respecting health and safety measures
- Taking the responsibility for the received task
- Taking the initiative for solving some problems
- Rightness and respect for the customer
- Responsibility for the quality of the products.

Europass Mobility is a standard European document, which records details of the contents and the results - in terms of skills and competences or of academic achievements - of a period that a person of whatever age, educational level and occupational status has spent in another European country (UE/EFTA/EEA and candidate countries) for learning purposes.

Description of the mobility experience

21 OBJECTIVES OF THE MOBILITY EXPERIENCE *

PROJECT OBJECTIVES:

- 1.Training of general and technical skills and competences at high quality level in the initial training for technician technical calculation operator student .
- 2.Development of attitudes, behaviors, key competences, to the participants, coming from social media with risk of exclusion, in order to increase competitiveness and the degree of employment in the dynamic world of the labor market, becoming as active European citizens.
- 3.Developing cooperation with external partners capable of providing quality education and training for a successful career path and in the life of mobility participant

22 EDUCATION OR TRAINING INITIATIVE IN THE COURSE OF WHICH THE MOBILITY EXPERIENCE WAS COMPLETED

Erasmus + K1 -Mobility Project for VET learners -qualification-Computing Technician Operator

23 COMMUNITY OR MOBILITY PROGRAMME INVOLVED

Erasmus+ Mobility Project -2020-1-RO01-KA102-078278

DURATION OF THE EUROPASS MOBILITY EXPERIENCE

24 FROM * 17 01 2022 25 TO * 04 02 2022
dd mm yyyy dd mm yyyy

Skills acquired during the mobility experience

26A ACTIVITIES/TASKS CARRIED OUT *

The participant carried out the following learning activities:

- developed activities for installing Windows operating system according to PC configuration:studied the PC's configuration and to decided the proper Windows version,configure the BIOS for installing the operating system;prepared the hard disk for installing the operating system,install the operating system;the drivers for a proper functioning of the operating system;used the option for account administration in Control Panel;maked account operations;connectd the peripheral input and output equipment or input-output;installed the drivers and the programs associated to the peripheral devices of input, output or input-output.
- checked the daily updates of the operating system;used addition and deletion option Windows components;set up the Start Up option;achieved restorations for the operating system;set up the Control Panel options which allows the optimization of the operating system.
- installed applications in predefined conditions;uninstalled applications;
- installed programs necessary for break-in detection systems , for fire detection , systems ,video surveillance systems and video-interphonic surveillance systems
- installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers ,pdf ,installed the applications for file archivers and unpackers ,file managers, printing DVD's software.
- installed applications for the internet browsers, extensions;multimedia applications (media players, codecs);install security applications – antivirus, firewall:
- installed and to set up the Linux operating system,set up the BIOS for installed the operating system;prepared the hard disk for installing the operating system,drivers for a proper functioning of the operating system,use the option account administration from Control Panel;maked different operations with accounts;connected the input ,output or input-output peripheral equipment;
- installed the GParted Live application-partition for Linux system, the Open Source applications
- Installed applications for file archivers and archivers ,file managers, printing DVD's software-K3b for printing; installing the application Gimp for photos editing, Blender for 3D shaping; installing the applications for internet browsers, extensions : Opera for Linux , Skype for Linux ,Pidgin –instant messaging service, Beagle – searching engine.
- Installed the multimedia applications – media players, codecs :VLC media player for Linux; installed the security applications-antivirus, firewall, Magic Rescue for recovering files, IPCOP, Comodo antivirus
- installed programs necessary for break-in detection systems , for fire detection systems ,video surveillance systems and video-interphone surveillance systems for computers with Linux operating system
- installed and setting up the Android operating system; upgraded the operating system for a new version (OTA/ with computer system

-installed applications for office processor documents, spreadsheet ,multimedia presentations, database, documents readers , pdf for smartphones

Installed and setting up the IOS system , upgraded the system for a new version ,the system personalization , setted up the user account/ access the application magazine ,using the Cloud services

27A JOB-RELATED SKILLS

Skills:

- Knowing the license types and programmes for the operating systems
- Choosing the operating system to install depending on the hardware and requirements
- Installing /restoring of the operating system according to the license
- Installing/updating drivers according to the hardware
- Configuration of the computer system according to the users demands
- Responsible attitude in using the software
- Executing the installing operations autonomically
- Permanent interest for individual study and using the tutor information
- Taking critical attitude and responsible using of information
- Using correctly the common vocabulary and the speciality one
- Telling the results of the professional activity

Attitudes:

- Collaboration with the team members to fulfil the tasks
- Taking the responsibility related to functioning and the integrity of the equipment
- Permanent interest to make works respecting health and safety measures
- Taking the responsibility for the received task
